Entur has been given the great task to make it simple to choose a sustainable path with public transport in Norway. For this to happen, it is necessary to create new and unified solutions for the transport sector. To enable innovation we gather, enhance and share public data for public transport through open APIs.

Compelling Event
Entur decided to separate CI from CD to create deployment stability

CI/CD Ecosystem
CircleCI (CI)
Terraform (infra provisioning)
Kubernetes (GCP)
Prometheus
Grafana
Stackdriver

“We didn’t want a tool that we would have to manage ourselves so we could focus on our core business.”

Tommy A. Bo | DevOps Engineer

Harness Helps Entur Deploy 3x More Software with 75% less downtime Risk.

“The benefits of Harness Continuous Delivery
• Self-service Continuous Delivery for all developers
• Standardized deployment pipelines
• Little to no pipeline maintenance

Business Impact & ROI
• Reduced change failure rate from 20% to 5%
• 100% reduction in roll-back effort, from 2 hours to automatic
• 2x increase in velocity from bi-weekly to every three days

Harness is the industry’s first Continuous Delivery-as-a-Service platform that automates the entire CD process, keeps it secure, and uses machine learning to protect you when deployments fail.
